Corian® Training Courses

Courses Available

A) Two-Day Fabrication Course

The standard Two-Day Fabrication Course is aimed at people from the woodworking industry with bench hand joinery skills and little or no experience of working with solid surface.

The course covers everything listed in the Training Course Agenda below. It offers plenty of essential hands-on experience, enabling you to master new techniques and gain confidence in fabricating Corian® to DuPont[™] standards. The training can be carried out in your workshop or at our Training Centre in Leeds.

B) One-Day Refresher Course

The One-Day Refresher Course targets fabricators of other 12mm Solid Surface products and existing Corian® fabricators who simply need a refresher or would like to learn new techniques.

Courses can be held in your workshop or at our Training Centre in Leeds.

The course covers everything listed in the Training Course Agenda below. This is run at a faster pace than the two day course as the fabricator should already be familiar with some of the techniques and terminology used.

C) One-Day Bespoke Advance Course

The One-Day Advanced Course is a bespoke training session held at CDUK and tailored to meet your specific needs.

Please contact CDUK for more details.

D) Half-Day Fitter Course

The Half-Day Fitter Course is held at the CDUK Training Centre in Leeds and is specifically aimed at kitchen fitters who want to learn how to install Corian[®] work surfaces.

The course focuses on the fitting elements only and is not designed to show fabrication techniques.

Course Contents:

- Templating
- Site joints
- Sanding and finishing
- Repairs

CDUK Training Course Agenda

The Training Course Agenda only applies to courses A & B

Introduction

- Brief history of CDUK & DuPont Corian[®]
- Health and safety
- Sheet sizes (including part sheets)
- Colour samples & what the symbols mean
- Kitchen range
- Veined colours
- Translucent colours
- Metallics
- DCT
- Batch & sequence numbers
- Tools
- Workshop setup

Templating

- Materials
- Solid template
- Ladder frame template
- Digital template
- Key

Cutting & Joining Corian® Sheets

- Shaping
- Joint placement
- Mirror cut
- Workshop joint
- Site joint
- Wavy joint
- Cleaning
- Gluing
- Cleats

Creating Downturns for Corian[®] Work Surfaces

- Butted
- Rebated
- Mitred
- Internal corners

Suitable Substrate for Corian® Work Surfaces

- Suitable materials
- Ladder frame
- Solid sub-base

Overhangs in Corian®

- Unsupported limits
- Additional steel support

Thermoforming Corian®

- Ovens and presses
- Temperature & duration
- Formers
- Cramping

Corian® Sinks

- Positioning
- Bonding
- Cutting out
- Drainer grooves
- Support pad

High Strength Hob cut-out from Corian®

- Reinforced corner blocks
- Extended radius corners
- 3M Heat reflective tape

Dishwasher

• Supalux cement board

Coved Upstands

- Traditional method
- Cove router
- Internal corner

Sanding & Finishing Corian[®] Surfaces

- Recommended standard finishing for all colours
- DCT colours
- Cleaning

Repairing Corian®

- Plug repair
- Strip repair
- Pie cut repair

Fixings for Corian®

- Squirrel fixings
- Hinges
- Button fixings

Illuminating Corian®

• Applelec LED solutions

Terms & Conditions

All courses are suitable for a maximum of 6 people. All tools, training material and PPE with the exception of work boots will be supplied to attendees. Certificates are awarded on successful completion of the course.

Fabricator Tool List

Comprehensive starter kit containing high quality branded tools recommended by CDUK. All power tools available in 240v or 110v.

Training with CDUK helps towards a City and Guilds qualification

All individuals successfully completing a training course by CDUK in either fabricating or installing Corian[®] will now gain evidence towards passing the City and Guilds Level 2 Diploma in Furniture, Interiors and Wood Machining Unit 229 Fit and Fix Worksurfaces.

We have been training fabricators for 38 years and our team of experienced trainers are well known in the solid surface industry for their excellent knowledge and service levels.

Why is CDUK offering solid surface qualifications?

As the solid surface industry grows, CDUK is ensuring that Corian[®], as the market leader, is the first to develop opportunities for individuals to gain certified qualifications in both the fabrication and installation of solid surface. In turn, this should assist established Corian[®] fabricators to find new employees who already have relevant solid surface qualifications and experience.

For more information on organising training for your company, please call **0113 201 2240** or email **info@cdukltd.co.uk** and ask for your area sales manager to contact you.
